Weekly news and views from around the world and beyond.

New Madrid Finale

We have watched the New Madrid Fault Line climb through the Gulf from the Isthmus, then up the Mississippi River from New Orleans. After being stalled at the Hard Rock Bridge where the Ohio River connects with the Mississippi River, the Bridge finally slipped allowing the separation of the Portions to continue under the Seaway. Lately the buoys near Montreal showed that the Seaway was increasingly clapping, being pulled apart and then returning. Per the Zetas this has reached the Seaway exit now.

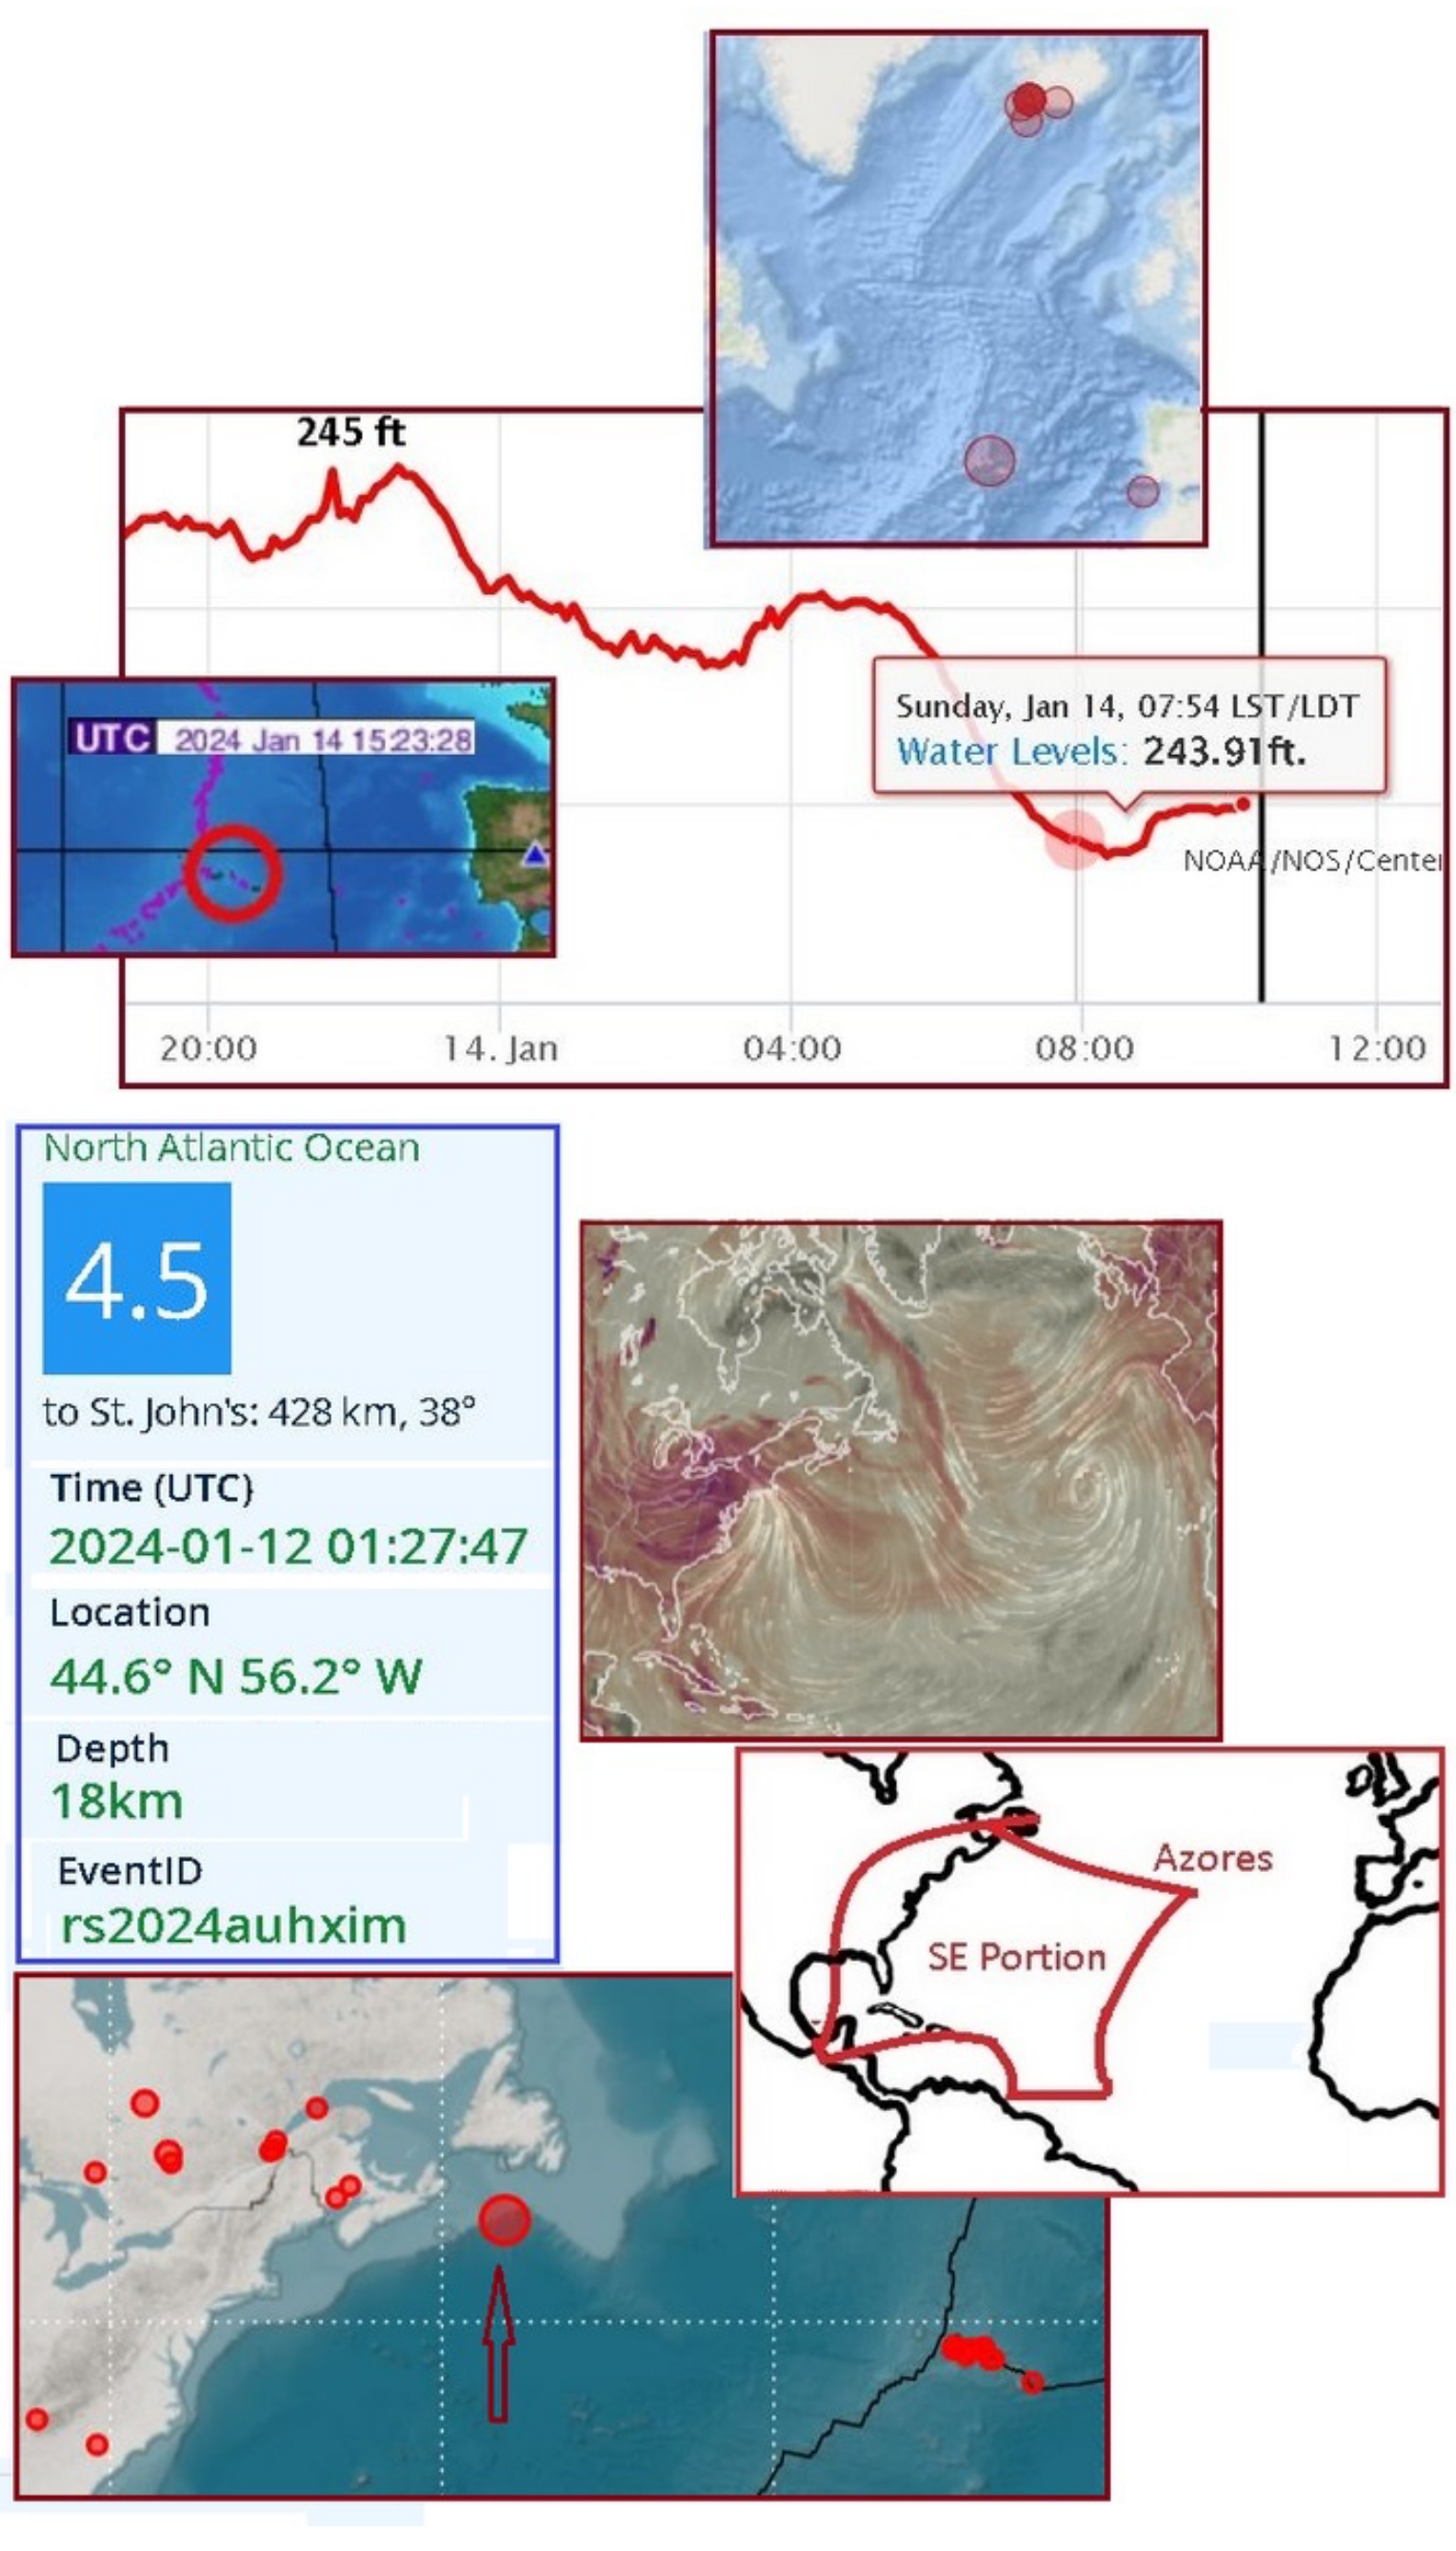
Photos Show ‘Rare’ Phenomenon on Lake Erie
January 14, 2023
https://www.msn.incom/en-us/weather/topstories/photos-show

> *As a powerful winter storm battered northern Ohio Saturday, 65 mph wind gusts caused a rare scene along Lake Erie. The near hurricane-force winds from the southwest pushed the more shallow water out further into the lake in the western bas of Lake Erie near Port Clinton and the Lake Erie Islands, especially at Put-in-Bay on South Bass Island in Ottawa County Saturday. Koehler said the boulders are usually under 6 to 9 feet of water, with just their tops exposed, and at times on Saturday, people were walking on the lake bed.*

ZetaTalk Confirmation **1/13/2024:** *As we have recently stated, the New Madrid Fault Line has separated between the Mainland and SE Portions all the way to the Seaway exit. Now only a small distance from the Exit to the Azores remains. There have been significant quakes at St Johns at the Seaway exit and also at the Azores – all within the past couple days. Meanwhile the Africa Roll has continued to pull both Africa and the SE Portion to the East and down. This latest evidence from the Lake Erie islands where the New Madrid Fault Line runs shows that the SE Portion is indeed on the move, and the Montreal clapping can be expected to accelerate.*

The New Madrid Fault Line Portions are now clinging together only in the N Atlantic, between the Seaway Exit and the Azores. The Azores is expected to clap during the Finale, such that it opens to an astonishing degree. Recent quakes at the Azores and at St Johns at the Seaway Exit define this battleground. When the SE Portion is free to move, there will be disasters up along the Mississippi and under the Seaway, with Chicago and Ohio cities such as Cleveland and Toledo being hit hard.



ZetaTalk Prediction **2010:** *When we stated that "Chicago will rupture and adjust" and "Ohio will be pulled in places" this should not be news to man. The New Madrid runs up along the Seaway, to the mouth of the Seaway, and thus will rupture any land it passes through. Plot its course and consider that more than the fault line itself will be disrupted. Rock detached from its former connections is free to react to the dominant theme in the area. If rock was held down, formerly, it can bounce up. If rock was held back, it is free to spring forward. And adjustment in rock strata means that loose soil will sink or heave. This most certainly can affect a broader area than just the fault line. We have stated that Ohio will be affected most in this regard.*

As the New Madrid fault line runs up along the Seaway just under the Great lakes in Ohio, cities such as Cleveland and Toledo will find their infrastructure greatly shattered in places as the rock beneath them will jut and drop, vertical adjustments. Buffalo, being virtually on the fault line, will likewise be shattered in this way, such that freeways become useless, but the seaway at Niagara Falls will remain.

Spiritual Paths

Earth is currently a schoolhouse for young souls, a self-study environment where they are presented with many choices and opportunities to either remain selfish like a newborn baby or to grow and become empathetic to others. This is not an intellectual decision. It is from the heart, and results in action to help others.

ZetaTalk Transformation **7/15/1995:** *The Earth has been designated as a future home for Service-to-Other oriented entities. To qualify for Service-to-Other orientation, an entity must consider others as often as the self. To qualify for Service-to-Self, the entity must focus on the self 95% of the time, almost exclusively. Where it may seem that these individuals would stand out, some very diplomatic and cultured people are of this category. They are able to disguise their self interest in condescension to others. They are able to disguise their self interest as the interests of the other.*

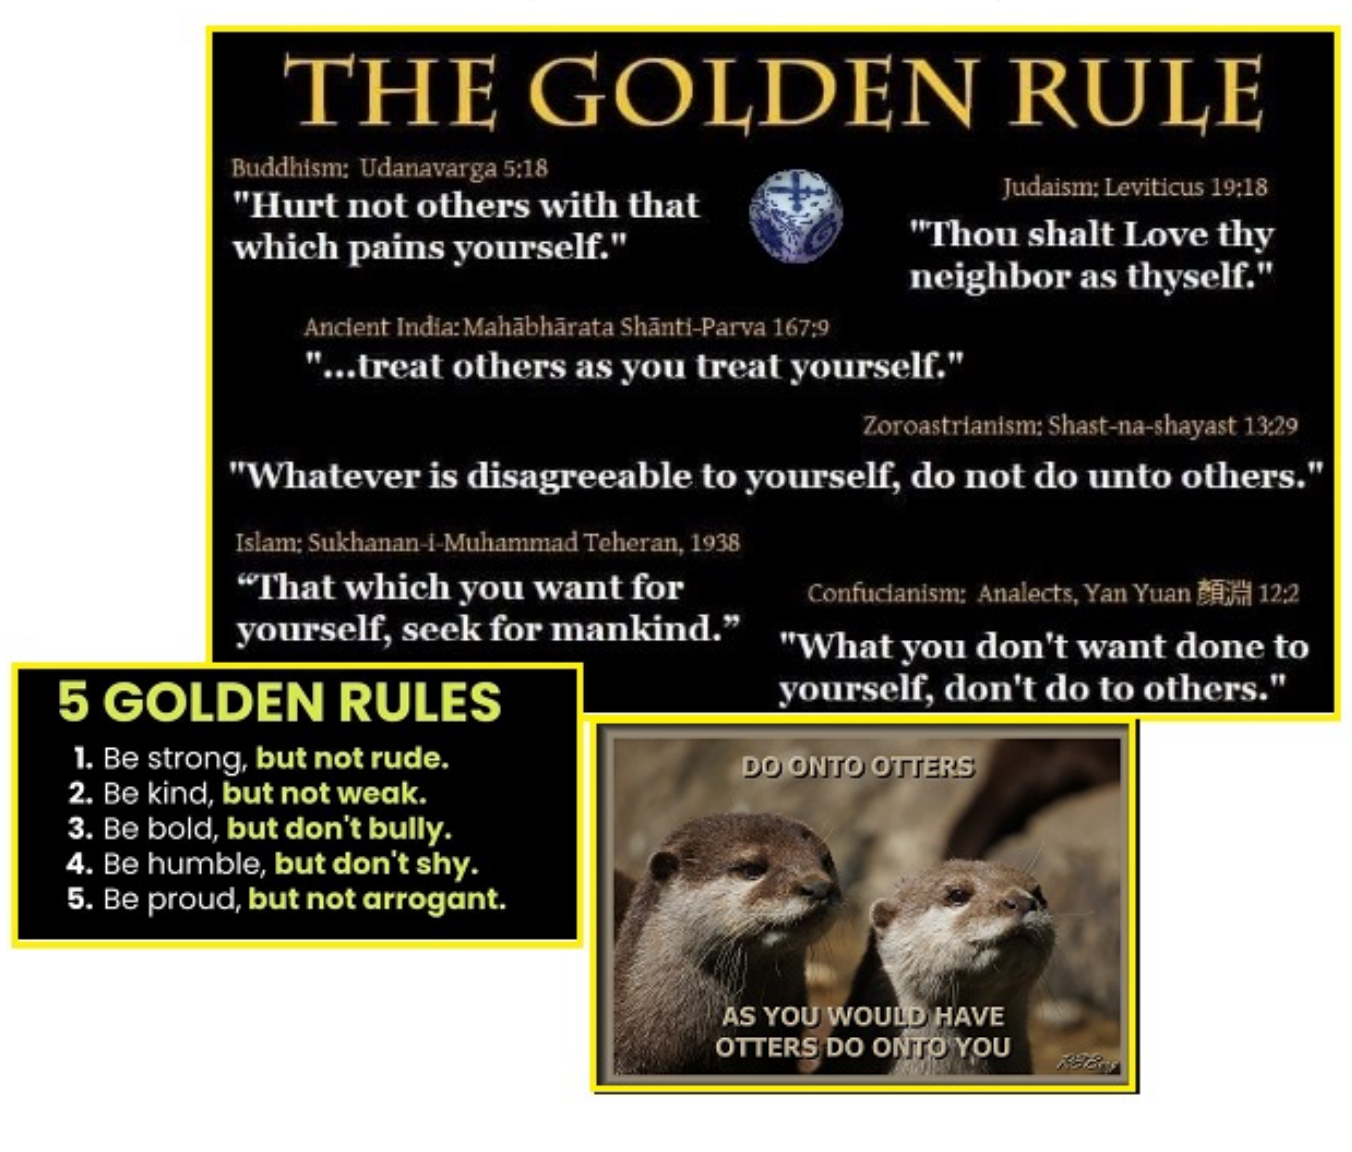
During 3rd Density, entities must decide their spiritual orientations - Service-to-Self or Service-to-Others. Most, the vast majority, decide the latter on almost all 3rd Density worlds. This decision, or the lesson of 3rd Density as it is called, needs to precede almost all other lessons, as mixing the two spiritual orientations together creates chaos and thus other lessons cannot proceed. Many humans on Earth are choosing the Service-to-Other orientation, and mid-incarnation are thus joining the ranks of the Service-to-Others. The world involves an increasing separation, by orientation, as the Transformation proceeds.

How to recognize a Service-to-Other act? A small gesture can make an immense difference in someone else’s life. A helping hand can pull someone off the edge where they have slipped and are about to fall. Or it could be the gift of some Amaranth seeds, that lysine rich wholly edible plant that would allow a family to have protein in their diet. Or it could be helping a family put the wheel back on their cart, so grandma can make the trip and the babies need not be carried by weary parents. A small thing. Making an immense difference.

ZetaTalk Action **4/26/2008:** *As we have explained, Earth is a schoolhouse where incarnated souls get a chance to take action, thus sorting out their spiritual orientation - Service-to-Other or Service-to-Self. Humans thus should not anticipate being saved, which is a Biblical reference to having someone other than the self taking action. You are to save yourself by taking action to help others.*

ZetaTalk Definition **8/8/2009:** *In order to be considered Service-to-Others an entity must think of others 50% of the time, the self 50% of the time. Service-to-Others does not mean being a pushover or a slave to the demands of others. Those who are highly Service-to-Others spend more time thinking about the welfare of others, and take action, often a great sacrifice to themselves.*

As Jesus said, “*do unto others as you would have them do unto you*”.

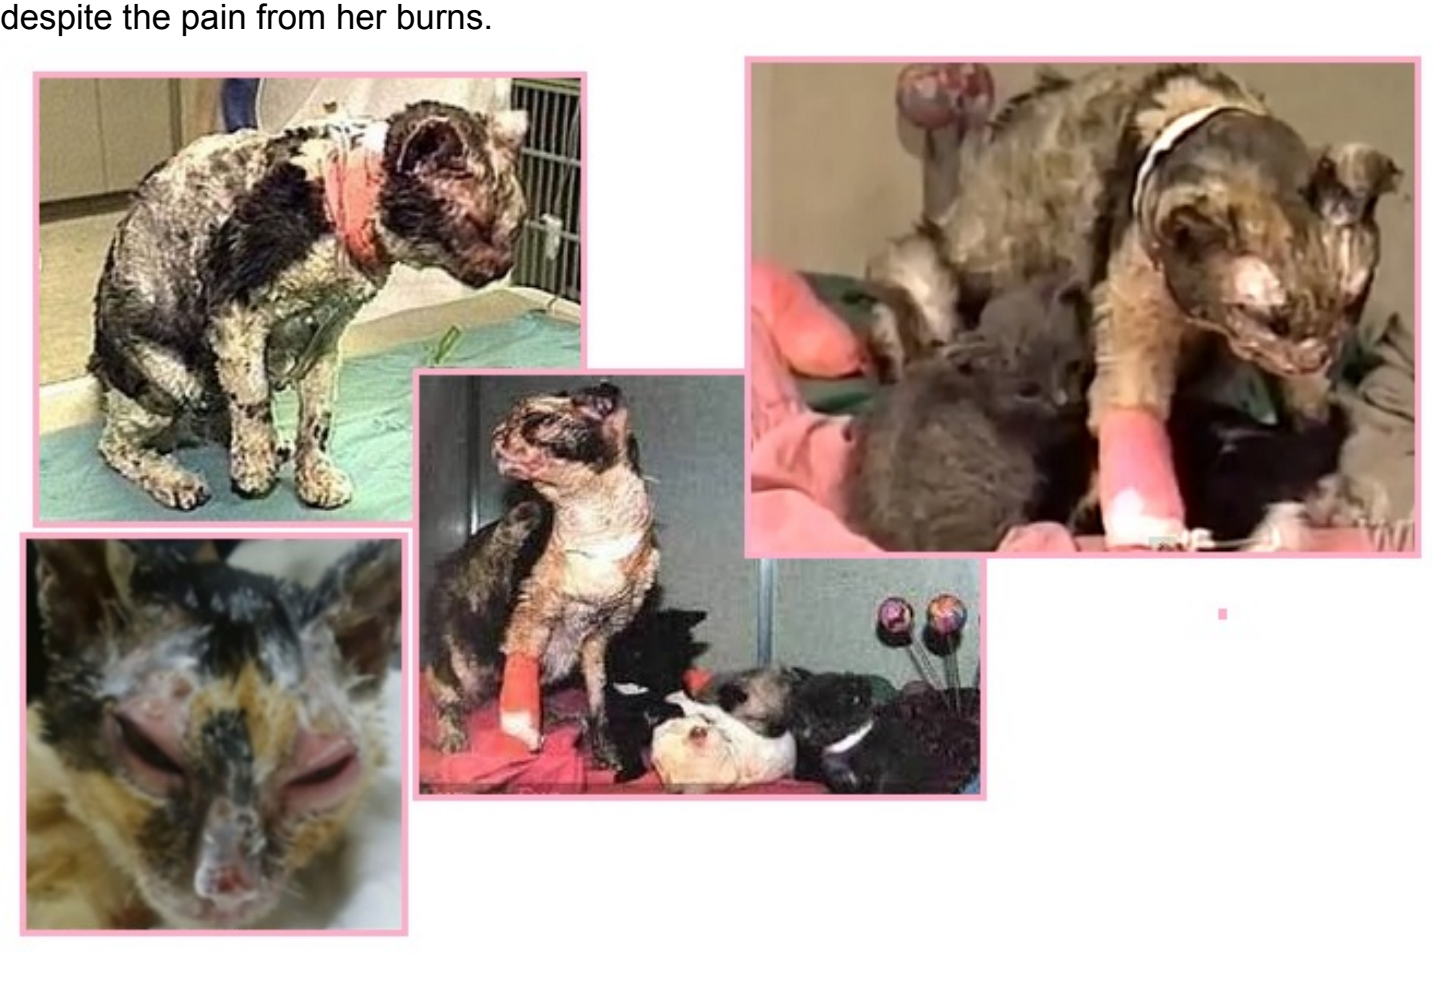


THE GOLDEN RULE
Buddhism: Udanavarga 5:18
"Hurt not others with that which pains yourself."
Judaism: Leviticus 19:18
"Thou shalt Love thy neighbor as thyself."
Ancient India: Mahābhārata Shānti-Parva 167:9
"...treat others as you treat yourself."
Zoroastrianism: Shast-na-shayast 13:29
"Whatever is disagreeable to yourself, do not do unto others."
Islam: Sukhanan-i-Muhammad Teheran, 1938
"That which you want for yourself, seek for mankind."
Confucianism: Analects, Yan Yuan 顏淵 12:2
"What you don't want done to yourself, don't do to others."
5 GOLDEN RULES
1. Be strong, but not rude.
2. Be kind, but not weak.
3. Be bold, but don't bully.
4. Be humble, but don't shy.
5. Be proud, but not arrogant.
DO ONTO OTTERS
AS YOU WOULD HAVE OTTERS DO ONTO YOU

Golden Rule
https://www.britannica.com/topic/Golden-Rule

> *This rule of conduct is a summary of the Christian’s duty to his neighbour and states a fundamental ethical principle. In its negative form, “Do not do to others what you would not like done to yourselves,” it occurs in the 2nd-century documents Didach? and the Apology of Aristides and may well have formed part of an early catechism. It recalls the command to “love the stranger (sojourner)” as found in Deuteronomy. It is not, however, peculiar to Christianity. Its negative form is to be found in Tob. 4:15, in the writings of the two great Jewish scholars Hillel (1st century BC) and Philo of Alexandria (1st centuries BC and AD), and in the Analects of Confucius (6th and 5th centuries BC). It also appears in one form or another in the writings of Plato, Aristotle, Isocrates, and Seneca.*

Animals will instinctively have empathy for others of their species as they are stirred when one of their own is exhibiting distress. Such as this mother cat who went through fire 5 times to rescue her kittens, despite the pain from her burns.



Scarlett
https://en.wikipedia.org/wiki/Scarlett_(cat)

> *When the fire was under control, one of the firefighters on the scene, David Giannelli, noticed Scarlett carrying her kittens away from the garage one by one. Scarlett herself had been severely burned in the process of pulling her kittens from the fire. Her eyes were blistered shut, her ears and paws burned, and her coat highly singed. The majority of her facial hair had been burnt away. After saving the kittens she was seen to touch each of her kittens with her nose to ensure they were all there, as the blisters on her eyes kept her from being able to see them, and then she collapsed unconscious.*

ZetaTalk Comment **7/15/1995**: *Love, or empathy, is something felt at an early age. Empathy is not an emotion reserved for the intelligent, sentient being alone. Love and empathy are felt by all forms of life, even plant life, to some degree. It is a factor of life. It is intrinsic to life.*

Dolphins are known to protect the pod, to protect each other, particularly from shark attack. Sharks are reportedly afraid of dolphins because they know the dolphin pod can kill them by ramming their pointed noses into the soft underbelly of the shark. Per the Zetas, most empathy manifests first within the same species, but the dolphin instinct to rush to the rescue is not limited to their own species. They have repeatedly been shown to defend humans from sharks. From one warm blooded species to another, they obviously care.

Dolphins Rescuing Humans
April 26, 2017
https://www.dolphins-world.com/dolphins-rescuing-humans/

> *Dolphins in the wild usually help the sick pod mates, supporting them to reach the surface so they can breathe. In Greek and old sea stories, there are dozens of claims of dolphins helping drowning sailors, rescuing people from sharks, and making themselves useful as guides through treacherous waters.*

This elephant named Lam Duan has been blind since she was young and has lived a dark, empty life
It's like a retirement center for elephants, many of which were used as laborers

Man Plays Piano to Sooth Ailing, Blind Elephants at Sanctuary in Thailand
October 30, 2018
https://www.cbsnews.com/news/man-plays-piano-blind-elephants

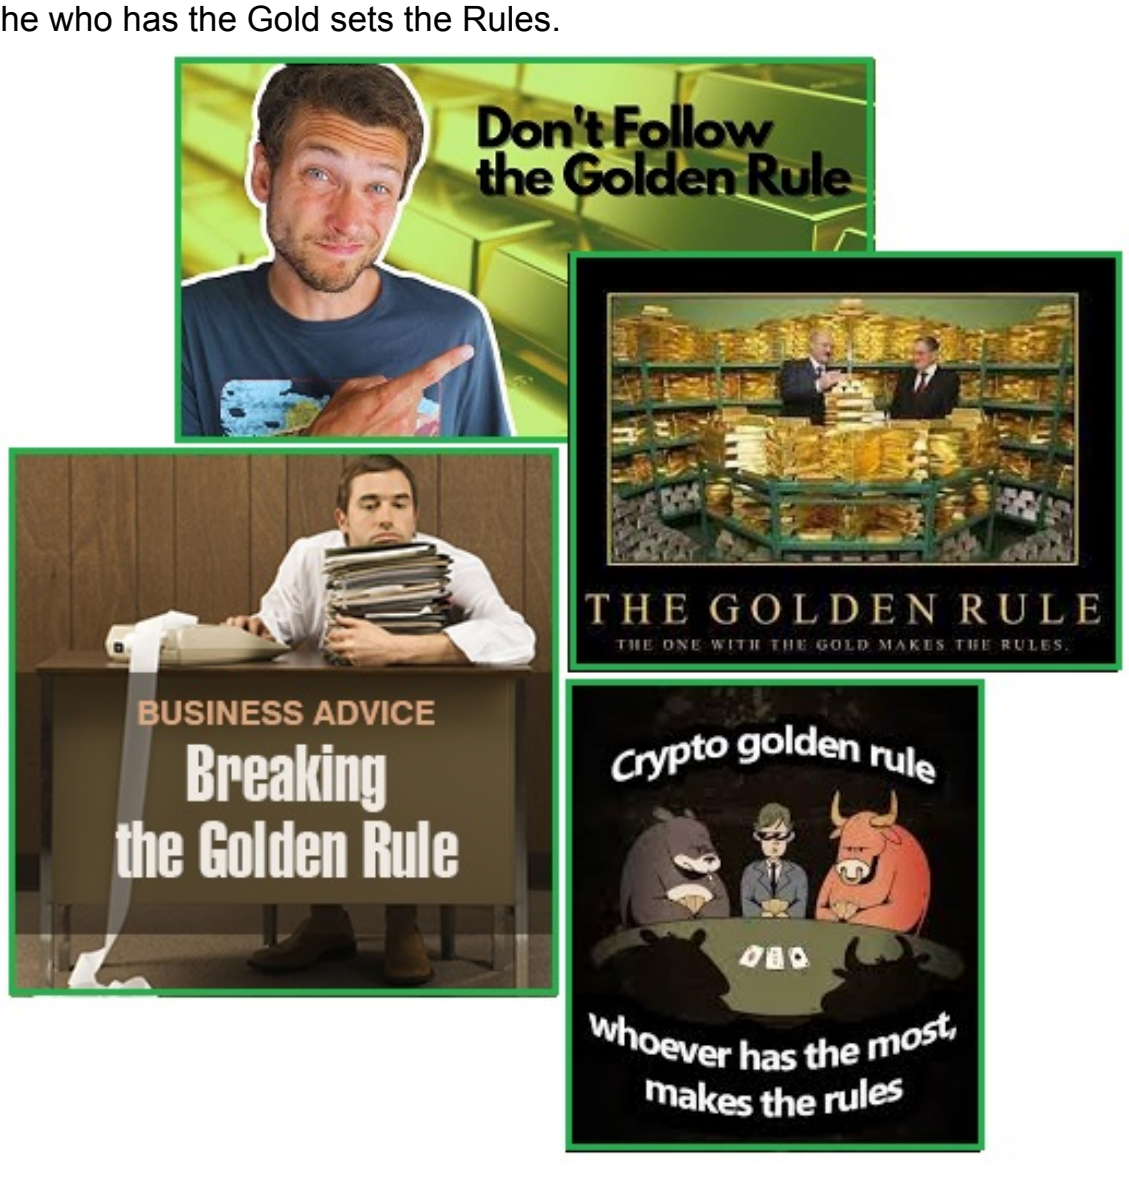
> *They say an elephant never forgets, and those at Elephants World in Thailand will certainly never forget Paul Barton. Barton is the man who introduced these elephants to classical music. The first time Barton played his piano at Elephants World, a blind elephant that was eating his breakfast stopped in his tracks when he heard Beethoven for the first time.*

For those who are Service-to-Other, it is taking away the pain that another is feeling, or would feel. Like the Grinch who Stole Christmas, whose heart grew 3 sizes the day he discovered empathy, the souls of Service-to-Other people become more wise and massive. Spiritual growth is the goal, here on Earth. So do that. And, as Dr Seuss says of the Grinch who Stole Christmas, “*his heart grew three sizes that day*”. Empathy, caring for others, builds the soul.

> *It could be, perhaps, that his shoes were too tight.*
> *It could be his head wasn't screwed on just right.*
> *But I think that the most likely reason of all*
> *May have been that his heart was two sizes too small.*
> *Maybe Christmas, he thought, doesn't come from a store.*
> *Maybe Christmas, perhaps, means a little bit more!*
> *And what happened then? Well, in Whoville they say*
> *That the Grinch's small heart grew three sizes that day!*

Separation Anxiety

For those who have remained immature, like newborn babies who can only think of themselves, the Transformation is a worrisome time. The Service-to-Self prey on others, and see the expanding groups of Service-to-Other individuals as a threat. The Zetas call this a polarizing trend, as the separation of the spiritual orientations expands its reach. Among the Service-to-Self, this invariably translates into money – he who has the Gold sets the Rules.



Don't Follow the Golden Rule
THE GOLDEN RULE
THE ONE WITH THE GOLD MAKES THE RULES.
BUSINESS ADVICE
Breaking the Golden Rule
Crypto golden rule
whoever has the most, makes the rules

ZetaTalk Confirmation **11/15/1995:** *Polarization in the main goes on undetected, with humans migrating to areas they sense will be more compatible with their thinking. Humans join groups, decide what shops to shop in, take walks in this or that park, all based on orientation, increasingly. Political groups, religious affiliations, all are affected by orientation leanings. Decisions as to what groups to belong to, what locales to live in, what employer to work for, are made daily based on the sense the human has that their chosen orientation fits in.*

The percentage of Service-to-Other on the Earth is tipping, and the Service-to-Self among humans feel uncomfortable. They group more tightly, to be with their like kind. They seek more control, get more shrill, dictate more rules, and restrict access to themselves. This is all to increase their comfort level, to return to the comfort level they remember in prior times. This desire for control, to return to the good-ol-days, is what in fact drives the polarization, as the Service-to-Self willingly separate!

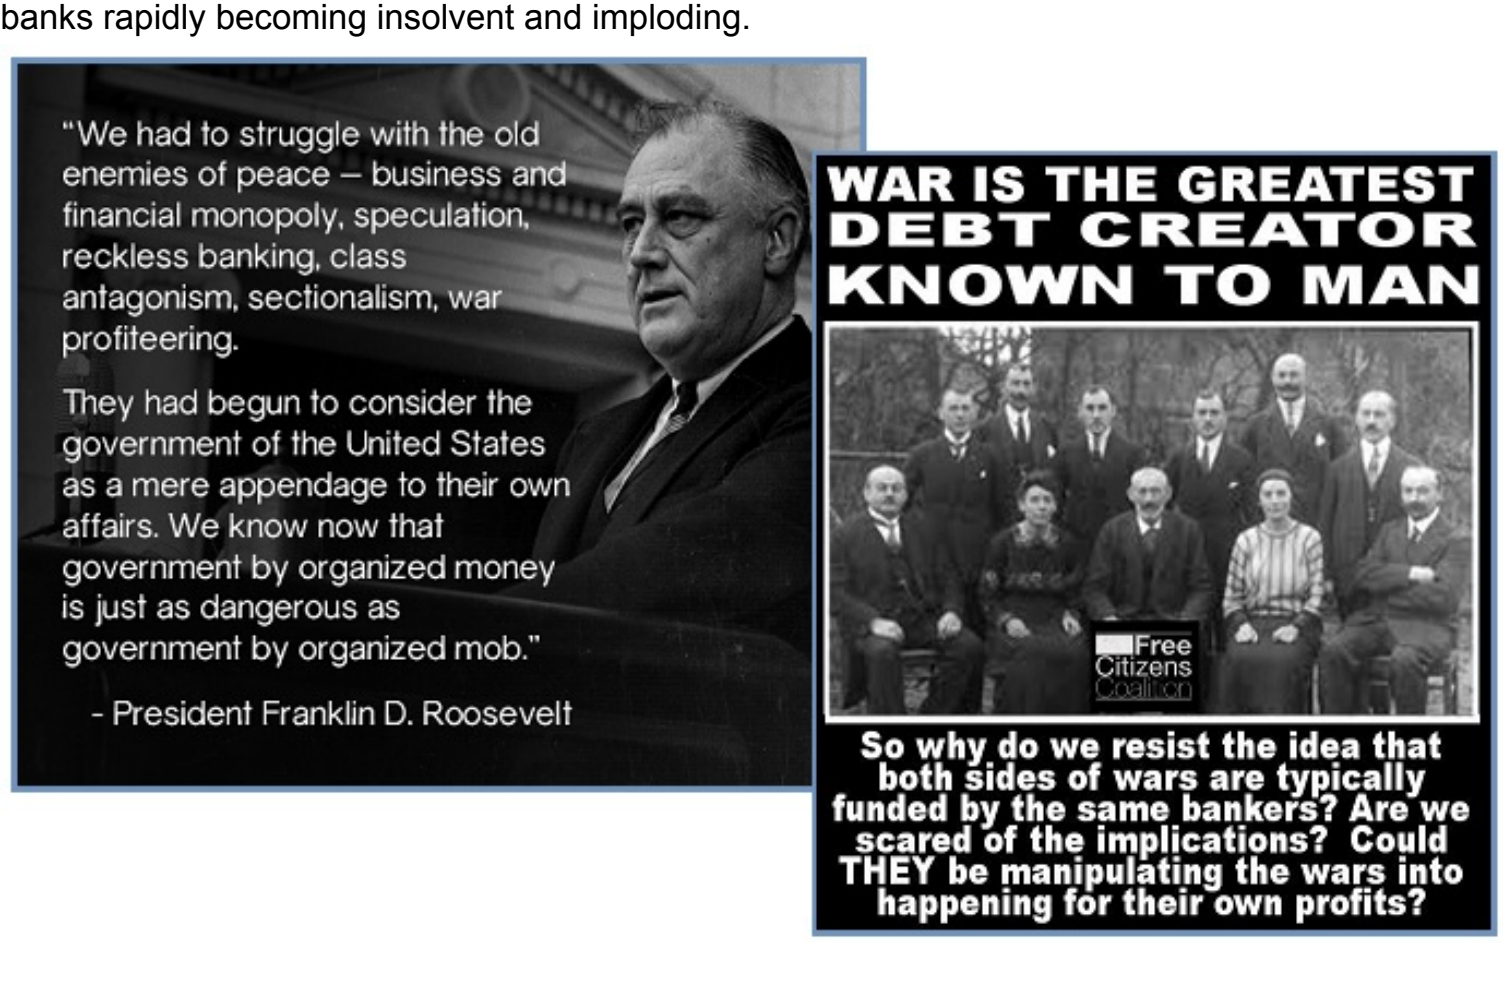
It is a known fact that the founder of the Rothschild banks, Nathan Rothschild, made money coming and going during wars. He funded both sides, and charged interest every step of the way. It is a sign of the Transformation that the BRICS banking consortium is in the ascendance, with the WEF Rothchild western banks rapidly becoming insolvent and imploding.



"We had to struggle with the old enemies of peace – business and financial monopoly, speculation, reckless banking, class antagonism, sectionalism, war profiteering.
They had begun to consider the government of the United States as a mere appendage to their own affairs. We know now that government by organized money is just as dangerous as government by organized mob."
- President Franklin D. Roosevelt
WAR IS THE GREATEST DEBT CREATOR KNOWN TO MAN
Free Citizens Coalition
So why do we resist the idea that both sides of wars are typically funded by the same bankers? Are we scared of the implications? Could THEY be manipulating the wars into happening for their own profits?

The Hidden History of the Incredibly Evil Khazarian Mafia
March 8, 2015
https://veteranstoday.com/2015/03/08/the-hidden-history

> *The Rothschild bankers learned early on that war was a great way to double their money in a short time by lending money to both warring sides.*

The Real Enemy Is Within
September 7, 2015
https://www.truthdig.com/articles/the-real-enemy-is-within/

> *War is a business. Profits swell. War never stops. Whole sections of the earth live in terror.*

The annual meeting of the BRICS founders took place in S Africa this year and was a celebration of sorts. More than 20 countries have asked to join the consortium, and six of them were accepted. No new BRICS currency has been issued, and trade between member countries will remain in their respective fiat. Primarily, they will not be trading amongst themselves with US dollars or Euros. BRICS is noted for being Gold backed and having low interest loans. The IMF is known for a colonial attitude and debt slavery.

ZetaTalk Separating **2/15/2015:** *In that the 3rd Density world that man currently lives in is such that they cannot easily group by orientation, into Service-to-Other or Service-to-Self groups, this is a point of confusion during this Transformation time. Then enter the rule of law, societal laws, which require these relationships to continue. Governments do not want groups to isolate themselves, and consider this a great threat. So how does this change, after the shift, during the Transformation? First, isolation and separation from government control is automatic. Governments will lose control utterly, and isolation be the norm, not something sought. Thus, it comes down to how a small group, or a community, might separate and polarize.*

You have the Service-to-Self minded, who go off to loot and look for the weak. They thus are removed from strongly Service-to-Other groups, as these groups tend to cooperate well with each other, and defend themselves. Now you have the undecided, remaining with the Service-to-Other or straggling along on the periphery of the Service-to-Self. In a Service-to-Other environment, there is much serious discussion, and expectation that all will work hard for the general welfare. Undecided find this grim, no fun, and at the first opportunity peel away and set off on their own. Thus, if doing well, they establish their own communities, and if not doing well, die off.

To a great extent, the every-day life that man has today, in civilized countries, will not exist. Disease, infections, and accidents will strike quickly and decimate survivors. Thus, Service-to-Other communities will increasingly find themselves the survivors among survivors. When this occurs, they will find themselves in contact with high tech communities of humans and hybrids, living together. At this point, if not earlier by being assisted unannounced, they will find their lives improved. Thus, to imagine this polarization, this separation by orientation, remove the rule of law, the demands of society, and carry forward the natural trends you see among people today.

Geophysicists Baffled

The 7 of 10 Plate Movements that would result from the Daily Earth Wobble that had emerged as Nibiru approached were defined in 2004 and 2010, and clearly stated that the Indo-Australian driving under the Himalayas was to be considered the “brake”. If it did not move, the other Plate Movements were stalled. It was thus listed as #1 on the Plate Movement graphic and ZetaTalk descriptions. Is it any wonder that during the Nibiru coverup geophysicists struggle to explain this process? They can’t explain it, thus this is a case of Zetas RIGHT Again.

Indian Tectonic Plate Is Splitting in Two Beneath Tibet, Latest Analysis Finds
January 17, 2024
https://www.sciencealert.com/indian-tectonic-plate-is-splitting-in-two

> *Presenting at the American Geophysical Union conference in San Francisco last December, researchers from institutions in the US and China described a disintegration of the Indian continental plate as it grinds along the basement of the Eurasian tectonic plate that sits atop it. It's a surprising compromise on two models currently favored as explanations for the lifting of the Tibetan plateau and the colossal Himalayan mountain range. In both cases, a collision between the chunks of crust belonging to India and Eurasia is responsible. They determined the Indian slab wasn't merely bobbing along smoothly below the Eurasian plate, nor was it bunching up like a rug on a slippery floor. Instead it is delaminating, with its dense base peeling free and sinking into the mantle as its lighter top-half continued its journey just beneath the surface.*

ZetaTalk Confirmation **1/19/2024:** *What emerged from this Geophysical Union Conference was that the theories on why the Himalayan Mountains have been pushed high do not match the evidence collected and provided. Nor does either theory explain the ongoing process where Tibet is covered in quakes while India sinks. Of course, given the ongoing coverup over Nibiru and the Daily Earth Wobble it incites, there would be no explanation that would suffice. We, the Zetas, explained how the wobble would affect the crust in 2004, and this has only increased. Thus Zetas RIGHT Again.*

ZetaTalk Confirmation **2004:** *Are we going to develop a wobble? Are we going to suddenly lurch about so that the Sun is rising and setting in a place way off from where the public would expect? And what happens to the crust when that happens?*

ZetaTalk Confirmation **2010:** *The 7 of 10 scenarios describe plate movements, and for this to occur something has to release the deadlock, the current stalemate where the plates are locked against each other. Once the deadlock is broken and the plates start moving, sliding past each other, new points where the plates are locked against each other develop, but these are weaker locks than the one at present. The current lock, as we have so often stated, is the Indo-Australian Plate which is being driven under the Himalayas. This is no small lock, as the height of the Himalayas attests. Nevertheless, the activity in this region shows this likely to be the first of the 7 of 10 scenarios to manifest.*

ZetaTalk Confirmation **2010:** *Though the Indo-Australian plate is sometimes referred to as two separate plates, this plate operates as one and will continue to do so.*
